Courses Synopsis

SYNTHETIC TEST DOCUMENT | FICTIONAL SCHOOL AND STUDENT | NOT A REAL TRANSCRIPT

Student Name	Rami Test-Student		
Student ID	DVIS-SYN-0457	**Nationality**	Egyptian
Date of Birth	14/03/2007	**Date of Issue**	15/06/2024

Course Name	Description
AP Computer Science A	An introductory university-level programming course taught in Java. Topics include objects and classes, control flow, arrays and lists, recursion, searching and sorting, and basic program design and testing.
AP Statistics	Covers exploring data, planning studies, probability and random variables, sampling distributions, confidence intervals and hypothesis tests for means and proportions, and regression.
AP Calculus BC	Covers limits, derivatives and integrals, with additional work on parametric and polar functions, sequences and series, and techniques of integration beyond the AB scope.
AP English Language	Develops skills in rhetorical analysis and argument. Students read nonfiction prose from several periods and write analytical, argumentative, and synthesis essays.
AP Psychology	An introduction to the scientific study of behaviour and mental processes, including research methods, biological bases, learning, cognition, development, personality, and social psychology.
