Student ID	SYN-2001	**Nationality**	Synthetic
Date of Birth	01/01/2006	**Date of Issue**	20/06/2023

Course Name	Description
AP Biology	AP Biology is an introductory college-level biology course, especially appropriate for students who wish to pursue an interest in the life sciences. It is a full-year course that is the equivalent of a two-semester college introductory biology course for biology majors. To be enrolled in this course, students should have completed high school courses in biology and chemistry and should have taken or be concurrently taking statistics. This course explores topics like evolution, energetics, information storage and transfer, and system interactions. The framework of this course outlines distinct skills, called science practices, that students should practice throughout the year—skills that will help them learn to think and act like biologists. It is required that 25 percent of the instructional time be used in hands-on laboratory work, focusing on inquiry-based investigations that provide students with opportunities for science practices to be applied.
AP Calculus AB	The topics covered in Advanced Placement Calculus include functions, graphs, limits, concept of derivative, derivative at a point, the derivative as a function, second derivatives, applications of the derivative, Riemann Sums, interpretations and properties of definite integrals, applications of integrals, and the Fundamental Theorem of Calculus.
Arabic A	This course follows the curriculum of the Ministry of Education specific to private schools in the United Arab Emirates. The framework covers different subject skills in terms of continuity of literary knowledge, poetic and informational texts that explore the past in an effort to preserve the cultural heritage, in addition to listening skills, speaking, writing, and research. The course content is presented in innovative methods with the aim of developing analytical skills, as well as critical thinking and expression.
English 12	English IV is a college/career preparatory course that continues the development of reading and communication skills through the analysis of literary and informational texts. This course focuses on building reading, writing, speaking, and listening, and language skills.
Islamic A	The curriculum of grade Twelve aims to achieve the characteristics of the Emirati students, strengthen their loyalty and belonging to their homeland, immunize them from the ideas of extremism and terrorism, developing the skills of the twenty-first century and achieving the requirements of sustainable development. The curriculum included the following themes: The Holy Qur'an; Surat Al-Noor, Believe and greed: Extremism Values: Responsibility in Islam, Rules of Islam; (Separation between spouses, and the biography of the characters). As the lesson of the Prophet biography and seerah: The prophet and social life. The curriculum has been reinforced with the basic provisions of intonation, which are taught in an integrative constructivist manner, where students are taught the subject of recitation and intonation independently and given through a lesson every week. The curriculum is generally implemented through three lessons per week
